

NVIDIA Inception VC Alliance Benefits

NVIDIA Deep Learning Institute Credits and Discounts

Help development teams sharpen technical skills

- Learn how to set up an end-to-end project in less than a day or how to apply a specific technology or development technique in just a few hours—anytime, anywhere—with just a computer and an internet connection.
- Inception members receive free NVIDIA Deep Learning Institute (DLI) credits for self-paced courses and discounts on instructor-led workshops.

- > Access range of educational materials, self-paced and live training, and educator programs
- > Gives individual developers and teams tools to advance knowledge in AI, accelerated computing, data science, graphics, simulation, and more

Next Steps for Startups

Apply

Apply to the [NVIDIA Inception Program](#) for startups (list the investor that referred you).

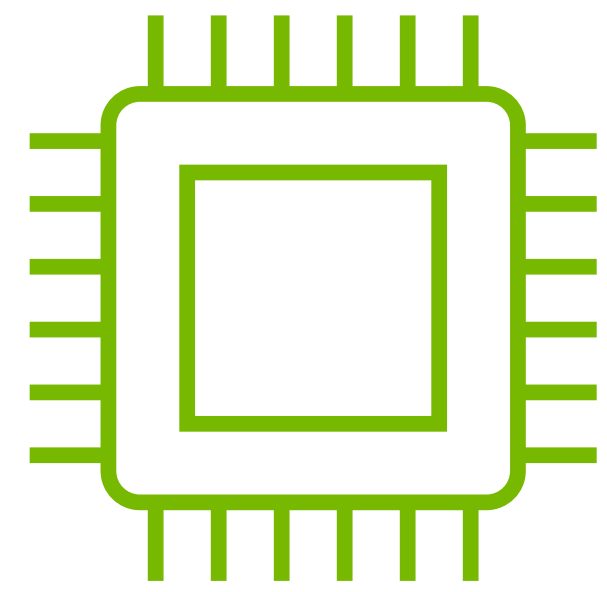

Request Benefits

Once NVIDIA approves your application, you can request benefits through the member portal.

Preferred Pricing on NVIDIA Hardware

Accelerate solution development at portfolio companies

- Get preferred pricing on a range of NVIDIA hardware to accelerate development with the latest technology.
- Inception members with a VC Alliance investor also have access to NVIDIA Solution Engineering support for infrastructure design questions.

- > Gain access to a dedicated supply of NVIDIA's latest hardware architectures
- > Eliminate tedious set up and testing with ready-to-run, optimized AI software
- > Enjoy full enterprise support on GPU platforms
- > Use NVIDIA's partner network to negotiate, procure, and configure all your infrastructure needs

Preferred Pricing on NVIDIA Software

Help portfolio companies develop solutions faster

- Get preferred pricing on a range of NVIDIA software to accelerate development with the latest technology.
- Inception members with a VC Alliance investor also have access to NVIDIA Solution Engineering support for infrastructure design questions.

- > Receive discounts and early access opportunities to NVIDIA software via Inception
- > Eliminate tedious set up and testing with ready-to-run, optimized AI software
- > Full enterprise support on our GPU software platforms
- > Use NVIDIA's partner network to negotiate, procure, and configure all your infrastructure needs

Free Cloud Credits from CSP Partners

Access NVIDIA GPUs in the cloud

- Access various cloud credit benefits through NVIDIA's CSP partnerships.
- Cloud credit requests are based on a company's adoption of NVIDIA technologies, intended use of cloud credits for solution development, and the completeness of its company profile in the Inception Portal.

- > Accelerate AI Development: Use powerful GPUs to speed up model training and deployment
- > Cost Efficiency: Reduce operational costs with free cloud credits, maximizing budget
- > Scalability: Scale compute resources to meet growing demands
- > Global Reach: Credits are available across multiple CSPs for flexible, worldwide deployment

Preferred Pricing on NVIDIA DGX Cloud

AI training-as-a-service for the era of generative AI

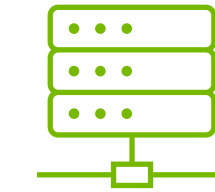

- NVIDIA [DGX Cloud](#) is designed for businesses training large-scale, multi-node LLM and AI models, as well as those using NVIDIA containers. With up to three times the utilization efficiency of traditional infrastructure, DGX Cloud vastly improves training performance and developer productivity.
- Inception members qualify for 30% off standard price of DGX Cloud (min four nodes for one month; \$75k min spend).

Software

- > Full-stack software suite to streamline AI model development
 - > Automated infrastructure management
- > NVIDIA Base Command™ Platform
- > NVIDIA AI Enterprise software suite
 - > Hybrid-cloud support

Hardware

- > Network fabric, purpose-built for multi-node training
 - > Multi-node capable
- > Eight NVIDIA A100 or H100 Tensor Core GPUs per node (640GB total)
 - > Near limitless access to GPUs
 - > 10TB of storage per instance

Services

- > Access to NVIDIA AI experts
- > 24/7 business-critical support
 - > Technical account manager
- > Customer service success manager
 - > Single-point-of-contact support

Frictionless Access to the Best of NVIDIA Hardware and Software

Use Brev.dev (now part of NVIDIA) to fine-tune, train, or deploy with easy-to-use GPUs

- **Get a GPU:** A single interface between DGX-Cloud, AWS, GCP, Fluidstack, and other GPU clouds. Use credits when you have them. Choose an instance based on costs and availability.
- **Set Up Software:** CUDA just works. Dependencies installed properly. No more Python environment issues. Sit back and let Brev do the work.
- **Effortless Access:** Access your instance from anywhere via Jupyter Notebook, VSCode, or through our CLI.
